CORRECTION DE L'EXAMEN DE MECAVIQUE DU 5/3/19

Escencice 1

$$\frac{2}{z_0} = -g - \frac{d}{m}$$

$$\ddot{z} = -g - \frac{d}{m} \ddot{z} \implies \frac{dr}{dt} + \frac{1}{\tau} r = -g \quad \text{wec} \quad \tau = \frac{m}{d}$$

$$v(t=0)=0 \text{ donc } K=gT \implies v(t)=-gT\left(1-exp\left(-\frac{t}{T}\right)\right)$$

Exercice 2

arec AB=2,5 km

2)
$$\frac{1}{2}mV_{6}^{2}-O=W_{AB}(P')+W_{AB}(R')+W_{AB}(F')$$
 $||F'||,AB$

$$4> [F=1,3.10^{5} N]$$
